

GIDEON EZEH

Research Data Manager | MEL Specialist | Impact Evaluation

[Email](#) | [LinkedIn](#) | [Portfolio](#)

Abuja, Nigeria

PROFESSIONAL SUMMARY

Results-driven Research Data Manager and MEL Specialist with over 6 years of experience designing and implementing quantitative evaluation frameworks, managing large-scale health and development datasets, and producing defensible analytical evidence for donor-funded programmes. Proven track record leading impact evaluations, quasi-experimental assessments, and mixed-methods data systems across complex national programmes, including USAID, NMEP, and NGO-funded assignments. Expertise in statistical analysis, data quality assurance, indicator management, and dashboard development using STATA, R, Power BI, and DHIS2. Adept at translating complex quantitative findings into accessible insights for technical and non-technical stakeholders.

CORE COMPETENCIES

Evaluation Design • Impact & quasi-experimental evaluations • Before-after comparative analysis • Theory of change development • Sampling & indicator matrices	MEL & Data Systems • MEL framework design • Indicator reference matrices • DQA protocols & audit trails • DHIS2 integration • KPI tracking & reporting	Statistical Analysis • STATA (preferred) & R • Descriptive & trend analysis • Scorecards & dashboards • Reproducible analysis code	Data Management • Multi-source data cleaning • Large routine health datasets • Digital tool configuration • Geo-coded data systems • ETL & data governance
Visualization & Reporting • Power BI dashboards • Advanced Excel (Power Query, PivotTables) • Technical briefs & presentations	Health Information Systems • DHIS2 analytical use • HMIS & surveillance data • Malaria micro-stratification • Conflict & governance surveys	Collaboration & Tools • Microsoft Teams & SharePoint • Google Workspace • Kobo Toolbox • Agile project coordination • Stakeholder management	

PROFESSIONAL EXPERIENCE

Research Data Manager | Jhpiego Nigeria

April 2026 – July 2026 • Abuja, Nigeria

Served as Research Data Manager on the Nigeria C19RM Impact Evaluation, a Global Fund-financed multi-domain impact evaluation implemented with NACA and NTBLCP, spanning all 36 states and the FCT across 11–12 investment domains (~USD 373M in Global Fund disbursements).

Quantitative Analysis & Evaluation Design

- Led domain-by-domain quantitative analysis of IIRMS survey data (~1,100 variables across ~951 sites, 77 enumerators, 37 states), applying chi-squared, Fisher's exact, Kruskal-Wallis, Mann-Whitney U, and Wilcoxon signed-rank tests with Benjamini-Hochberg FDR correction.
- Delivered standardised six-sheet analytical workbooks (Descriptive, Comparative, Trend, Equity, Sensitivity, Charts) per domain using Python (pandas, openpyxl, scipy) and Stata 18.
- Completed quantitative analysis for the Community Systems Strengthening and Medical Oxygen & Therapeutics domains, with Laboratory Systems and Supply Chain domains in progress.

Data Systems & Quality Assurance

- Applied the PROGRESS-Plus equity framework and OECD-DAC evaluation criteria (relevance, effectiveness, impact, sustainability) across analytical outputs, including Wagstaff concentration indices for equity analysis.
- Integrated routine health data sources (SORMAS, DHIS2, NDR, NHLMIS) into trend and comparative analysis layers.
- Established GPS validation and data quality assurance protocols for a modular KoboToolbox dataset collected across national household- and site-level surveys.

Head of M&E / Monitoring, Evaluation & Performance Intelligence | Ducit Blue Foundation (DBF)

2025 – Present • Abuja, Nigeria

Leads the MEL function for DBF's AMR Policy and Governance Programme for African Youth, designing evaluation frameworks and performance intelligence systems across programme cohorts.

MEL Framework & Evaluation Design

- Integrate MEL frameworks into analytics systems through indicator development, KPI tracking, and performance reporting aligned with programme theories of change.
- Design and adapt M&E tools across multiple programme cohorts, including pre/post assessments, attendance tracking, session feedback, and intern/mentor evaluation instruments.
- Develop indicator reference matrices with clear definitions, data sources, baselines, and reporting protocols to ensure measurement consistency.
- Establish DQA protocols, including validation rules, data cleaning, and audit trails, to ensure integrity of programme data across cohorts.

Quantitative Analysis & Evidence Generation

- Produce dashboards, briefs, and learning products (using Power BI and Advanced Excel) that translate quantitative findings into actionable recommendations.
- Build M&E Analysis Dashboards with live COUNTIF/COUNTIFS formulas, dropdown validation, and visual summaries for programme managers and executive stakeholders.
- Generate domain-specific scorecards and comparative outputs demonstrating before-after change and contribution to programme goals.

Strategic Positioning & Learning

- Facilitate data-driven learning and knowledge-sharing sessions to strengthen institutional accountability and continuous improvement.
- Contribute to DBF's strategic positioning as a data-driven solutions provider through high-quality analytical products for internal and external stakeholders.
- Support innovation in analytics, automation, and digital reporting platforms aligned with organisational and partner expectations.

Cross-Programme Data Support

- Provide data and analytical support across multiple projects in line with organisational priorities, ensuring timely delivery of reliable insights.
- Collaborate with cross-functional teams to embed data-driven approaches into planning, performance monitoring, and decision-making.

Senior Data Analyst & BI Trainer | Data-Lead Africa

April 2020 – June 2025 • Abuja / Multi-State

Directed quantitative research design, MEL data system implementation, and GIS-integrated analytics for national-scale evaluations under USAID, NMEP/MSH, Mercy Corps, WaterAid, and Caritas Nigeria mandates.

USAID Violence and Conflict Assessment (VCA) — National Household Survey

- Served as Survey Lead/Mixed-Methods Data Manager for one of Nigeria's most extensive conflict household surveys, covering 3 states, 40 LGAs, and 1,572 enumeration areas.
- Developed the sampling frame, EA selection, and LGA stratification strategy for a nationally representative dataset.
- Programmed digital data collection tools with embedded skip patterns and real-time DQA constraints; supervised field teams across multiple LGAs.
- Managed oversight of quantitative and qualitative data flows, including geo-coded records, audio validation, and anonymized secure storage.

- Integrated household survey data with KIIs, FGDs, and conflict system mapping for comprehensive mixed-methods triangulation.

National Malaria Micro-Stratification Household Survey — NMEP/MSH

- Provided GIS and data systems leadership for a 19-state malaria micro-stratification survey combining epidemiological methods with spatial analysis.
- Directed the collection of household-level prevention, treatment, LLIN, and IPTp indicators, with geolocation capture enabling spatial transmission mapping.
- Integrated survey data with DHIS2 routine data, climatic profiles, and ecological layers to support LGA-level stratification modelling.
- Led development of GIS dashboards displaying LGA risk profiles, intervention coverage, and micro-strata classifications using QGIS and ArcGIS.
- Ensured positional accuracy through GPS metadata checks, coordinate validation, and automated QC flags across all household listings.

M&E Data System Implementation — Caritas Nigeria

- Served as Business Analyst/M&E Data System Specialist, designing and implementing a real-time, dashboard-driven M&E system transitioning processes from manual tracking.
- Designed end-to-end data pipeline from field collection to reporting, standardising data definitions, validation rules, and flow architecture.
- Configured Kobo Toolbox digital tools with embedded validation logic for beneficiary tracking, service delivery, and outcome data capture.
- Established DQA protocols including automated checks, real-time monitoring of submissions, and cleaning/harmonization workflows.
- Built and maintained real-time Power BI dashboards for programme managers and executive leadership, enabling timely evidence-based decisions.

EDUCATION

Bachelor of Science — Biochemistry | University of Nigeria, Nsukka

August 2018
